## General accident prevention technics in the laboratory of medical physics

Bishkek - 2021

### **Safety instruction No.1 for the physics classroom**

1. These Safety Rules apply to the physics room. The university administration is responsible for the creation of safe working and learning conditions, and the person responsible for the office is responsible for the implementation of these Rules.
2. Operation of the physics room is allowed only after permission of the commission, which includes the rector of the university, the chairman of the trade union committee and the person responsible for the room.
3. The person in charge of the physics room takes the necessary measures to create healthy and safe conditions for conducting classes, ensures that the current rules and instructions for occupational safety and health are followed; conducts classes and works in the presence of appropriate equipment and other conditions stipulated by the rules and regulations on safety; ensures the safe condition of workplaces, equipment, devices; instructs students on occupational safety and health, immediately notifies the heads of the institution about each accident; bears responsibility for accidents resulting from his failure to fulfil the obligations imposed by these rules.
4. A laboratory assistant working under the direction of the person responsible for the physics room is responsible for the correct storage and operation of equipment, its preparation for laboratory and practical work, demonstration experiments, the prevention of devices and equipment, fixtures and fittings, the availability of first aid and fire-fighting equipment. Monitors students' compliance with occupational safety and health regulations.
5. The person in charge of the physics room, as well as the teachers who use this room, periodically, in accordance with the current rules, undergo course retraining in labour protection with subsequent certification.
6. It is prohibited to use devices and accessories that do not meet labour safety requirements; use electrical equipment that does not meet the standards.
7. The person in charge of the physics room, as well as the teachers who use this room for teaching purposes, are obliged to turn off the electrical equipment that is energized at the end of the work, and when leaving, close the room door with a key.

With the safety rules for the physics classroom familiar:
